WEATHER CROP BULLETIN.

Condition of the Small Crops: Through Kentucky Up to Yesterday.

The rains the last of August and the first of September made the prospect for fall grasses very fine, and many of my correspondents report that the indications were never better; but since that time we have had a very severe drought, accompanied with hot sun and drying winds, which has dried the ground, and stopped vegetation of all kinds. The drought is widespread, not being confined to our state. In many localities stock water is very scarce, and farmers are ments. You will find all of the above at having to haul drinking water. In the pastifew days, there have been light rains in some counties, but nothing like a general-rain. I have some reports that the drought is unprecedented, grasses entirely dried up, and farmers feeding their stock as they do in the winter time.

There has been an average acreage of wheat sown, although the present price is very low and future indications inot very bright. Many correspondents report that they have sowed their wheat a person buys a piano but once in a lifetime, in the dust, not enough moisture to sprout and it is, therefore, very important that the it. Others that their wheat has sprouted and much of it will die for the 'want of and much of it will die for the "want of rain. A number of letters have been received by the Commissioner of Agriculture acknowledging the receipt of wheat the favored one sold upward of sixty thousand planos; and the favored one sold upward of sixty thousand planos of the favored one sold upward of sixty from his office, and speaking in the highest praise; of the quality of the grain. The two varieties of wheat which was distributed were grown by Judge Vanmeter charge; and it will be found to be an interestof Ohio, a very large farmer, who takes ing publication. great interest in testing all, new kinds of wheat.

While the reports are very varied as to the condition of tobacco, they all agree as to it having been cut and housed in good order and fine color, and curing well. It is impossible to get a report that is strictly correct, for often two correspondents of the same county will |differ from ten to fifteen points, although this season the weather has been more favorable to the dark tobacco districts, which will show a difference in the per cent. in favor of the dark tobacco. In comparing the reports, we will separate them to show the difference. The condition for Burley is 75 per cent., while for the entire state, both Burley and dark tobacco is 85 per cent., as compared with last Original New York Company,

The yield of corn per acre can hardly be determined as yet, as [very little] has been gathered; enough, however, thas been gathered for feeding hogs to determine that the crop will not be large, and the indications are that the quality will cent., as placed by the correspondents, is larger than was anticipated-90 per

Owing to the drought the hemp crop is very short. The condition compared with last year is only 56 per cent.

The condition and fatness of hogs be ing fed for market compared with last year are 95 per cent. The number of hogs being fed for market compared with last year is 80 per cent.

The condition of beef cattle being fed compared with last year is 85 per cent. The number being fed for market com pared with last year is 80 per cent.

Owing to the drought the yield of Irish potatoes is only fair, the condition

being 84 per cent. The hay crop is very good, the average yield being one and a half tons per acre.

> THE Free-trade policy of the Democratic party never built a mile of railroad, never established a mill or factory, never increased the demand for skilled or unskilled labor and never added a penny to the pay envelope of a toiler. Whenever it has been tried in this country it has brought silence and idleness to wheels and spindles that had been busy, rust and decay to machinery that had sung of prosperous industry, and want and despair to homes that had been filled with happiness and abundance.
